Antiox

Where expertise meets discerning needs

Complete Supply of Micronutrients

Antiox is a unique blend of antioxidants comprises Ethoxyquin, BHT (Butylated Hydroxytoluene), TBHQ (Tertiary Butylhydroquinone) and Citric Acid, effectively provide a broad spectrum protection against oxidation spoilage for feed and feed ingredients.

Mode of Action

Interrupt oxidation especially of unsaturated fatty acids and carotenoids, stabilize them in their original forms, thus prevent/slow down oxidative degradation of feed ingredients that negatively affect animal performance.

Advantages

- Effective at low concentrations in preserving feeds that contain animal or plant oils, fat-soluble vitamins, pigments, and other feed ingredients that are susceptible to oxidation.
- Easy to use, safe and nontoxic to human and animals.

Benefits

- Prevent/slow down oxidation and rancidity, conserve nutrients and maintain feed quality.
- Stabilize critical oxidation-susceptible ingredients to achieve minimal nutrient losses during mixing and storage.
- Reduce feed cost, improve feed utilization and growth performance.

Recommended Dosage

AntiOx 6 is effective with 150-200g/MT feed.

Storage and Shelf Life

Antiox is stable up to 12 months when stored in a cool and dry place, away from direct heat and light.

Packaging

25kg kraft bag coated by PE woven layer and aluminium.
